### A D V A N T A G E

#### **THE MOELLER ADVANTAGE**

*Moeller is your best value for standard and special punches, die buttons and special details. Moeller Precision Tool encompasses over 140,000 square feet of manufacturing and warehouse space in our state-of-the-art facilities. We take pride in our reputation for providing quality components and unrivaled customer service. Our commitment to customer satisfaction and exceeding industry standards has set Moeller apart from the competition. The world's largest and most demanding stampers and die shops specify Moeller Precision Tool products.*

#### **STATE-OF-THE-ART EQUIPMENT**

- *Moeller's equipment is the most technologically advanced in the industry.*
- *Capabilities include CNC Conventional/Wire EDM, CNC Turning & Milling, CNC Jig Grinding, Profile Grinding*
- *Climate controlled inspection department featuring SPC Quality Control and certification capabilities to assure the highest quality products to our customers*
- *CMM equipment and reverse engineering scan capabilities*

#### **COMPREHENSIVE INVENTORY**

- *Most comprehensive selections of both inch and metric sizes of hardened punches and die button blanks, available in ball lock or headed styles*
- *Moeller True Set retainers are the most accurate retainer available. True Set is stocked in ball lock and shoulder styles.*
- *Moeller features Special Springs Nitrogen Gas Cylinders and Mechanical Die Springs; the industries highest performing springs.*
- *Moeller's Service Stock program offers same day delivery for special tooling needs. Your tools are on our shelves at less cost to you and immediately available.*

#### **PATENTED PRODUCTS AND SERVICES**

- *Moeller is the industry leader for consistent quality and new innovative products.*
- *Moeller's many patented products and services have provided significant cost saving solutions to our industry's most demanding consumers of tooling components.*
- **M-CAD** *is the most comprehensive tooling design software available. **M-CAD** allows designers to create and engineer all of Moeller's Catalog Components into their process applications.*
